

8X/8 -

## DESSCRIPTIF

The Nelo 8X / 8-is rather intended for rowers from 85 to 100 kg. We designed and developed this boat to accentuate the sensations of sliding. We have redesigned its hull in order to reduce the cavitation on its longitudinal axis and thus reduce the oscillation from front to back.

Built in high-tech composites, it can be available in a classic version with front bearing or a version with rear bearing with 4 fixing points on the gunwale.

Renowned for its responsiveness, speed and glide, this FISA minimum weight competition boat will convince top athletes.
